## NASAA Certified Organic Input Directory for Organic Production and Processing

Valid until 31 January 2019

The NASAA Certified Organic Input Directory lists input products assessed as compliant against the [NASAA Organic and Biodynamic Standard](#) and the [National Standard for Organic and Biodynamic Produce](#).

Products are listed under six different categories:

- *Crop Fertilisers and Soil Amendments*
- *Crop Management and Pest Control*
- *Livestock Production Materials*
- *Edible Minerals*
- *Processing and Handling Products*
- *Seeds and Plant Materials*

The inputs included in the 2018 directory\* are certified at the time of publishing which is valid until 31 January 2019. As the data may change over 12 months, it is best to also check the [NCO website](#) for the latest list of certified input manufacturer and products.

Note, if you are certified to additional certification programs such as USDA NOP or JAS, please make sure you obtain a copy of the approval for inputs for the relevant additional standard. USDA NOP Compliance for individual products is listed where applicable in this directory (NOP Compliance Letters are valid for 12 months only).

If you have any further questions or feedback, please contact the NCO Office.
